

Billionaires, am I right?

How can they have so much while we have unhoused people in this country!

Immigrants, am I right?

How can we be letting new people in when we aren't taking care of Americans first!

---

It's going to be so painful to watch.

The tearing down of two of the productive groups in America.

Billionaires will go away.

Immigrants will go away.

The problems will continue to get worse.

---

The problem is the unproductive. The rich unproductive and the poor unproductive. The finance middle-man and welfare recipient. The real estate agent and the person [on disability](#). The person with a fake job. Anyone who purposefully creates complexity for others. The obstructionists. Rent seekers. Anyone who lobbies against others getting so they can have relatively more.

Broken systems that elevate zero sum losers.

Why can't we all turn against them?

The first step is recognizing this is the problem. I don't know why most people don't see it.
